Website: Nadiia Melnyk BC Solution Developer

Professional Summary

Microsoft Dynamics 365 Business Central Developer with 4.5+ years delivering end-to-end ERP implementations, system migrations, and digital transformation solutions. Proven expertise leading NAV-to-BC upgrade projects (NAV 2009–2018 → BC 14–26) across international clients, combining technical development with business process consulting in complex multi-ISV environments. Specializing in cloud-based BC implementations, API integrations, and AI-driven automation.

Work Experience

Microsoft Dynamics NAV / 365 Business Central Solution Developer

Oct 2023 – Present

- Led NAV-to-BC upgrade project with a 5-person development team, delivering 100% on-time go-live within the agreed window for an international client
- Improved ISV solution performance by 2.5x, reducing posting routine execution time by 60% through code optimization and redesign
- Developed custom API integration connecting Business Central with third-party ISV applications, enabling seamless automated data exchange
- Designed AI-driven ESG reporting solution to provide automated context analysis and goal completion forecasting capabilities
- Managed and optimized ISV solution, redesigning outdated functionality to modern BC standards
- Mentored a senior developer to lead data migration and upgrade projects
- Implemented customizations across Finance, Sales, and Purchasing modules based on business requirements
- Troubleshot and resolved complex system issues, maintaining high system stability and performance

---

Microsoft Dynamics NAV / 365 Business Central Software Development Engineer

Jul 2021 – Oct 2023

- Led 3 of 10 NAV-to-BC upgrade projects (NAV 2009–2018 → BC on-prem & SaaS) with teams of 2–5 developers, achieving 100% go-live success rate with zero critical post-deployment issues
- Successfully migrated legacy Financials 2.9 (pre-NAV) system to Business Central with zero data loss
- Executed complex database migration of ~1TB data volume, ensuring data integrity and zero downtime

- Mentored 3 junior developers to mid-level positions, achieving 100% promotion success rate
- Executed full-cycle code upgrades and data migration planning, validation, and deployment for international clients in complex multi-ISV environments
- Reimplemented outdated features to modern BC standards (pricing engine, emailing framework), improving system performance and maintainability
- Developed custom solutions including RDLC/Word reports, API integrations, and performance optimizations based on client requirements
- Coordinated directly with international clients for requirements gathering, go-live support, and post-deployment stabilization
